IT Security Policy

Kestrel Ridge Logistics - fictional company for demonstration purposes

1. Scope

This policy applies to employees, contractors and visitors who use any Kestrel Ridge Logistics system, network or device.

2. Passwords and MFA

Passwords must have at least 14 characters; long passphrases are recommended. Passwords are changed only when there is a suspicion of compromise, not on a fixed schedule.

Multi-factor authentication is mandatory for email, VPN and the PeopleHub HR portal. Passwords must be stored in the company password manager.

3. Devices

Company laptops use full-disk encryption and lock the screen after 5 minutes of inactivity. USB storage devices are blocked by default.

Personal phones may access company email only after enrolment in the mobile device management system.

4. Phishing

Suspicious emails must be reported with the Report Phishing button in the mail client. The security team runs phishing simulations every quarter.

5. Incident reporting

A lost or stolen laptop or phone must be reported within 1 hour to the security desk at extension 4400 or security@kestrelridge.example.

6. Guest Wi-Fi

Visitors use the KR-Guest network. Reception issues a voucher that is valid for 24 hours.

7. Data classification

Information is classified as Public, Internal, Confidential or Restricted. Restricted data, such as payroll records, may never be sent to personal email accounts.
